

Advantage Treatment Centers, Inc.

Attention All Clients

Per the Governor's most recent order all client subsistence has been waived for 30 days from March 25th, 2020 through April 23rd. This will also serve as notice that we will waive all non-res fees. This order updates the previous letter you received. We will still implement for the time being the financial system paying less than full amounts towards your fines and fees. The state government as well as the programs seem to understand your situation and needs financially. Again, we will work with you to send money on a case by case basis and Case Managers have been asked to work with you on financial needs.

I know you are worried; we are too. We do not know what the next few weeks will bring for the COVID-19 crisis, but we do know that we will all be in this together. If you have been furloughed, please prove that this unprecedented initiative was the right plan and prove the "system" that they were right to trust you. If you have not been furloughed, please work with us to make the facilities a better place while this all works itself out. I can't imagine how hard it is to see clients leave and not be able to. Please email me with ANY concerns or ideas that you have to make it better. We are doing pool tournaments, and game nights, video game parties, and other things to help you all have something to do. Please bring your ideas, like always the best ones generally come from clients.

Wash your hands regularly, please help clean as much as possible, and together we will all stay safe and healthy. I ask this not only for the clients and staff in programs, but I ask this for the health of all of our families and loved ones that clients and staff have. We are all humans, COVID-19 does not care which side of the fence we are on, we are in this together. Thank you for your patience, we appreciate you!

Sincerely,

Josh Mayhugh, Vice President
